<sup>1</sup>Development Estimate (DE) as of the Base Year; Current Estimate (CE) as of June 30, 1982.

<sup>2</sup>The real dollar costs of program changes.

<sup>3</sup>Program Change Related (PCR). Escalation denotes the inflation costs of program changes measured at the time any change is implemented.

<sup>4</sup>Totals do not reflect rounding in Columns 2 to 4.

<sup>5</sup>Appropriated Spending and Quantity Procured (as C.E.) as of June 30, 1982.

<sup>6</sup>Derived from SAR program cost and quantity figures (June 30, 1982); includes advanced procurement, development and any other costs peculiar to program.

\*Cancelled by Congress in August 1982.

\*\*Impossible to determine future unit costs because system includes both vehicle-launcher (of which 36 percent were procured) and missiles (of which less than 2 percent were procured as of June 30, 1982).

\*\*\*This single estimate is taken from the SAR of December 31, 1981, as adjusted by the Navy for advanced procurement. The FY83 estimate in the SAR of June 30, 1982, was \$86 million, a jump that may be due to funds for the Vertical Launch System.
